## Profile

**I am your future data collaborator.** In my 2nd year of **BUT in Data Science** (with **BI** experience at **Layer Data**), I put my dual expertise in databases (**BTS**) and Business Intelligence at the service of your teams' performance. Dedicated and committed, I transform your data into valuable business solutions: **SQL**, **Python/ETL**, **statistical analysis**, and **Power BI** (**DAX**). What am I looking for? An **internship of 10 to 12 weeks** in data analysis and statistics starting **April 2027**. How about we schedule a meeting to discuss?

## Education

**BUT in Data Science (SD) — 2nd year (BUT 2)** — *IUT Clermont Auvergne, Aurillac* **Since 09/2026**

**Statistical Exploration and Modelling track** · Currently in progress

- **Studied topics:** Linear & multiple regression modelling, time series analysis (smoothing, forecasting), hypothesis testing, probabilities, statistical process control & reliability, R language (RStudio) and Python (SciPy, Statsmodels).

**BTS in IT — Database option** — *Institut International de Management, Béjaïa* **(Top of the graduating class)** **10/2022 – 01/2026**

- **Studied topics:** Relational data modelling (Merise, MCD/MLD, 3FN), advanced SQL queries, DBMS administration (PostgreSQL, MySQL, indexing, transactions, triggers) and application development.

**High School Diploma (Baccalauréat) — Mathematics track** — *Béjaïa, Algeria* **2021**

## Professional Experience

**Data Analyst & BI** — *Layer Data · when humans meet Data (Akbou, Algeria)* **02/2026 – 08/2026**

- **ETL Pipeline:** Cleaning and transformation of data with Python (Pandas) and SQL to feed a Data Warehouse.
- **Star Schema Modelling:** Designing dimensions and fact tables in Power BI, Power Query transformations and DAX measures.
- **Supply Chain Reporting:** Built a Power BI report for a food industry client (KPI tracking for orders/deliveries, data visualisation and sales forecasting).

**IT Technician and Manager** — *Cyber Café Khatri Khelaf (El Kseur, Algeria)* **09/2025 – 02/2026**

- **Support & Maintenance:** User support and technical maintenance for workstations and software.
- **Management:** Administrative tracking, invoice tracking and reports in Excel.

## Data & IT Projects

**Power BI Sales & Supply Chain Analytics** **2026 – 2027**

- **Architecture:** Multi-fact star schema (3 facts, 5 dimensions) and Power Query ETL pipeline.
- **Advanced DAX:** Measures organized into 7 display folders (CALCULATE, USERELATIONSHIP, Time Intelligence, What-If simulation).
- **Key Performance Indicators (KPIs):** Monitoring net sales, margin, customer portfolio, and OTIF service rate.

**Statistical Analysis & Time Series Forecasting** — *BUT SD SAÉ* **2026 – 2027**

- **Statistical Study (R & Python):** Data cleaning, hypothesis testing, predictive modelling, time series (smoothing, seasonal decomposition, forecasting) and reliability metrics.

**AVDA Auto — Dealership Management Application** **2026**

- **Desktop Development:** Offline-first desktop application developed with Electron, React and SQLite (stock, sales, CRM, billing).

## Technical Skills

| | |
|---|---|
| **Statistics & Data Modelling :** | R language (RStudio), Python (SciPy, Statsmodels), time series analysis (smoothing, forecasting), hypothesis testing, linear regression, probabilities, statistical process control. |
| **Data Analysis, ETL & BI :** | Python (Pandas, NumPy), ETL, data cleaning, Power BI, DAX (Time Intelligence, What-If), Power Query, star schema, Supply Chain KPIs (OTIF, ABC/Pareto). |
| **Databases & SQL :** | PostgreSQL, MySQL, SQLite, advanced SQL, relational modelling (Merise), indexing, query optimization. |
| **Development & Tools :** | Git / GitHub, Excel (PivotTables, advanced analysis), VS Code, Linux / Bash, JavaScript, React, Electron. |

## Languages

**French and Arabic:** native languages · **English:** B2 level
