Profile

I am your future data collaborator. In my 2nd year of **BUT in Data Science** (with **BI** experience at **Layer Data**), I put my dual expertise in databases (**BTS**) and Business Intelligence at the service of your teams' performance. Dedicated and committed, I transform your data into valuable business solutions: **SQL**, **Python/ETL**, **statistical analysis**, and **Power BI** (**DAX**). What am I looking for? An **internship of 10 to 12 weeks** in data analysis and statistics starting **April 2027**. How about we schedule a meeting to discuss?

Education

Since 09/2026 **BUT in Data Science (SD) — 2nd year (BUT 2)**
Statistical Exploration and Modelling track · Currently in progress · IUT Clermont Auvergne, Aurillac campus
Hypothesis testing, linear regression modelling, time series analysis (smoothing, forecasting), probabilities, statistical process control / reliability indicators · **R language (RStudio)** and **Python** (SciPy, Statsmodels).

10/2022 – 01/2026 **BTS in IT — Database option**
Institut International de Management, Béjaïa — **Top of the graduating class**

2021 **High School Diploma (Baccalauréat) — Mathematics track**
Béjaïa, Algeria

Professional Experience

02/2026 – 08/2026 **Data Analyst & BI**

Layer Data · *when humans meet Data* — Akbou, Algeria

- Preparation, **cleaning and transformation of data** with **Python** (Pandas) and **SQL** feeding a **Data Warehouse (ETL)**.
- Data modelling in **Power BI** (**Power Query**, **DAX**, **star schema modelling** connecting dimensions and fact tables).
- Design of a **reporting** and **data visualisation** dashboard (**Power BI Supply Chain report**) for **tracking KPIs** (orders, deliveries) and sales **forecasting models** for a **food industry client**.

09/2025 – 02/2026 **IT Technician and Manager**
Cyber Café Khatri Khelaf · El Kseur, Algeria

- Provided user support and technical maintenance for workstations and software.
- Administrative and financial management: invoice tracking and reports in **Excel**.

Data & IT Projects

2026 **Power BI Sales & Supply Chain Analytics (OTIF)**

- **Multi-fact Star Schema** (3 fact tables, 5 dimensions) and **advanced DAX** (USERELATIONSHIP, Time Intelligence, What-If parameters): tracking **Supply Chain service levels (OTIF**, Fill Rate, delay root causes), **ABC/Pareto** analysis, and profitability.

2026 – 2027 **BUT SD SAÉ — Statistical Analysis & Time Series Forecasting**

- Statistical study with **R** and **Python**: data cleaning, hypothesis testing, predictive modelling, **time series** (smoothing, seasonality, forecasting) and reliability metrics.

2026 **AVDA Auto — Dealership Management Application**

- Offline-first desktop application developed with **Electron**, **React** and **SQLite** (stock, sales, CRM, billing).

Technical Skills

Statistics & Data Modelling: R language (RStudio), **Python** (SciPy, Statsmodels), time series analysis (smoothing, forecasting), hypothesis testing, linear regression, probabilities, statistical process control.
Data Analysis, Processing & BI: Python (Pandas, NumPy), **ETL**, data cleaning and filtering, **Power BI**, **DAX** (Time Intelligence, What-If), **Power Query**, star schema, **Supply Chain KPIs (OTIF, ABC/Pareto)**, and **reporting**.
Databases & SQL: PostgreSQL, **MySQL**, **SQL**, relational modelling, indexing, query optimization, **SQLite**.
Development & Tools: Git/GitHub, **Excel** (PivotTables, advanced data analysis), VS Code, Linux / Bash, JavaScript, React, **Electron**.

Languages

French and Arabic: native languages · **English:** B2 level
